3rd July 2026

Dear Sir/Madam,

Huddersfield Bus Station, Upperhead Row, Huddersfield – (KIRK) Discharge of details reserved by condition 13 (phase two surface water mitigation measures) on previous permission 2025/91604 for variation condition 2 (plans) on previous permission 2024/92302 for refurbishment comprising (phase 1): facade improvements including Henry Street entrance; replacement shop fronts; alterations to external bus apron; extension and alterations to existing barrier within the bus alighting lane adjacent to Henry Street; (phase 2): new entrance canopy; public realm improvements; cycle hub; facade improvements including replacement shop fronts

Thank you for consulting Yorkshire Water regarding the above proposed development. We have the following comments:

YorkshireWater

Waste Water

Yorkshire Water have no objection to the discharge of condition 13.

As detailed in the statement for the discharge of conditions 13 and 33 submitted by HJCE:

Surface water runoff from the proposed canopy will be collected via the green roof system and conveyed through a siphonic rainwater drainage system before discharging into a new below-ground drainage network. The system will ultimately outfall to the existing Yorkshire Water public combined sewer located along the bus station frontage on Macauley Street. As identified within the Drainage Assessment prepared by Weetwood, "there are no proposed changes in contributing areas, and the existing drainage system will continue to be utilised." On this basis, no formal surface water attenuation or additional mitigation measures are proposed as part of the development.

Yours faithfully

George Mullaney
Town Planning Technician
