Subject: Formal Objection to Retrospective Application for Industrial Steel Fence – Land Opposite to 50 Park Road West, Crosland Moor, HD4 5BN

I am writing to submit a formal objection to the retrospective planning application for the industrial steel fence erected on the land adjacent to my property at 50 Park Road West, Crosland Moor, HD4 5BN.

This fence is wholly inappropriate for a residential area. It is an industrial grade structure, completely out of keeping with the character and natural landscape of the neighbourhood. The fence has been erected on a banked, sloping grassed area, which has always formed part of the natural green setting of this land. Installing an industrial fence on this type of sloped, landscaped ground is visually harsh, incongruous, and entirely unsuitable for its surroundings.

Since purchasing my home in 1986, this land has never had any fencing, and its open, green appearance has always been part of the local environment.

The fence has created a significant visual eyesore, which I am now forced to look at directly from both my kitchen and living room windows. This has had a clear and negative impact on the enjoyment of my home and the outlook I have had for nearly forty years.

I must also highlight that the applicant has felled more than 20 trees on this land without the required forestry permissions. This unauthorised tree removal has caused environmental harm, destroyed long standing natural screening, and has further exposed the intrusive appearance of the fence. My understanding is that this matter is currently under investigation, and it raises serious concerns about the applicant's disregard for environmental and planning regulations.

It is also important to note that this planning application is retrospective, submitted only after the fence was erected and after my husband, _____ reported the structure as a planning violation to Kirklees Planning. This behaviour demonstrates a clear disregard for planning controls and proper procedure.

I strongly object to this development and request that the Council take immediate enforcement action to remove the fence and restore the land to its original, open condition. The fence is visually intrusive, environmentally damaging in context, inconsistent with the character of the area, and appears to have been erected without appropriate permission.

I ask that this objection be formally recorded and fully considered as part of the planning and enforcement process as the person who lives directly opposite to this industrial fencing eyesore.

Yours faithfully,

□
