Postcode:	HD8 9QS

User comments

Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
The objection is regarding the treatment of the right of way , a public bridleway, which will be used as the main access for the site. The existence of the public bridleway and the safety of the users of this route is not properly addressed in the reports. The walkers, riders and cyclists will be adversely affected by these proposals, especially during the construction phase. The public rights have the priority, we have a right to the quiet enjoyment of this route which links to several other well used rights of way. All vehicles should/must be prepared to give way to the users of this public bridleway, speeds should be slow, signage will be needed, especially for HGVs, drawing attention to the fact that this is a public bridleway. Please review the proposals for the bridleway and ensure that the publics safety has priority.
