

Planning condition 23 – Materials Rev A

The materials that we have approval for are Newlay artificial stone and Hardrow Twillight roof tiles, shown below.

Unfortunately, we have been contacted by Hardrow to say that they have discontinued this tile and don't have enough to complete the development.

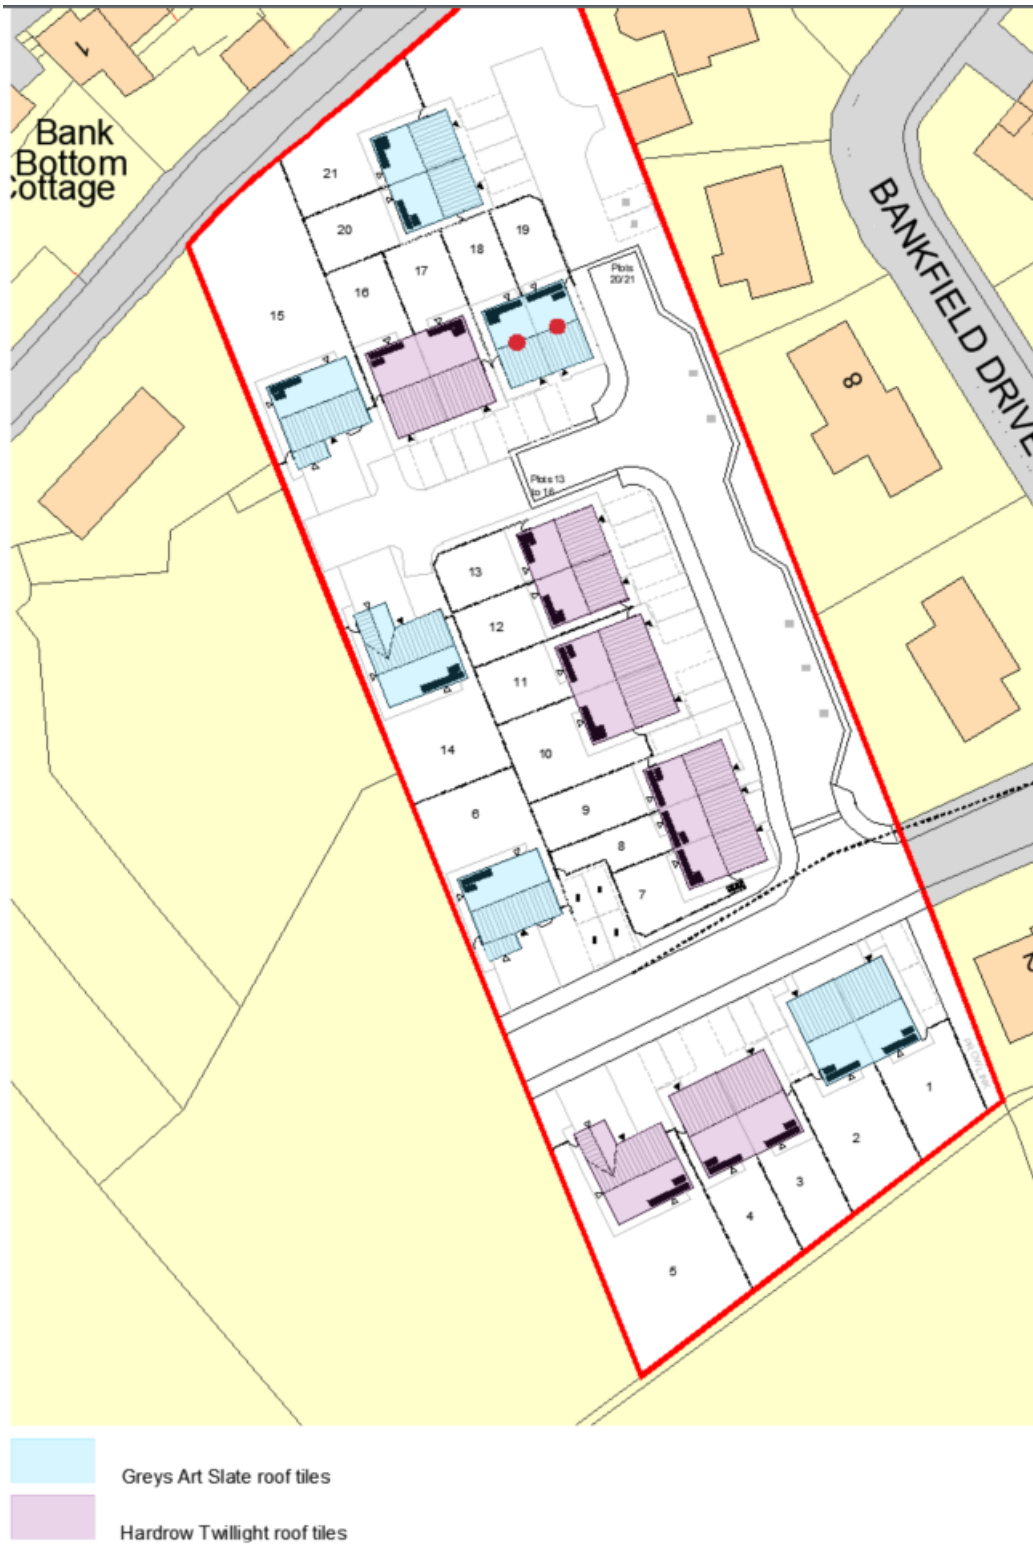

We have sourced an alternative tile which we would like to put forward for approval, The Grays Art Slate roof tile:

The image below is of the tile insitu and should give an odea of the colour of the tile.

We are proposing that the tiles should be mixed through the sites as the plan below:

We are not proposing to change the approved stone.
