I strongly wish to object to this planning application in our tiny community of Birdsedge. The proposed site is on open greenbelt agricultural farmland which has been farmed for generations for silage,hay and the grazing of sheep and cattle. The views are amazing and we need to preserve our dwindling countryside from urban sprawl Brownfield sites should be used before any precious greenbelt land As stated in the local plan We have wonderful wildlife deers barn owls rabbits hares foxes and this site is proposed far to close to ancient woodland and would greatly disturb the biodiversity. We have very limited infrastructure no amenities and overloaded gp surgeries! Try and get an appointment! The A629 which the new proposed developement will feed is extremely busy and any other traffic wether construction or residents will cause further disruption and more accidents especially those who never seem to think its not a race track through Birdsedge! Bus service is dire limited service only in week and non on a sunday. Thats if you want to go to Huddersfield or Denby Dale. I do strongly hope that our councillors will reject this application
