I am formally objecting to the proposed building of a housing estate on green belt land at Birds Edge for the following reasons. The green belt policy was put in place to protect the countryside, the openness of the lands, the landscapes character & to stop the loss of the countryside. To protect the ecology, heritage, trees & wildlife habitats. This development should not compromise the environment or the resources for future use - which it most certainly would. The highway safety, congestion, speeding vehicles confirmed by the police recently, access to schools, the infrastructure, GPS, drainage, sewers & no buses resulting in more cars parking wherever they can. Sustainable development should mean improving life without harming the earth or using up resources that future generations will need - & they WILL need fields like these for multiple reasons.
