This land is green belt. What has changed in the laws that makes this land ripe for building on. They say that the village has a good transport which in reality it doesn't. Buses are few and far between. Not enough doctors, dentists shops and other amenities in the area for the houses now. The houses will back onto houses already there which will mean they are overlooked and block out light. The houses planned do not fit with the look of the houses already in Birdsedge. The number being built will take over the village not add to it as it's a small village . Badgers roam the field during the night . Which you can see from where they have trodden down the undergrowth and droppings left . So how can you build on the land as I thought you were unable to kill remove or trap badgers under the protection of badgers act 1992. Only this week I saw 2 fawns running and playing in the field. What other wild life would be impacted ! The main road is very busy and fast and by building here would mean another accident hot spot just moved up the road from other junctions. These roads are Carr lane, Barnsley road and Carr hill road where they all join Penistone road with lots of accidents at all 3 points.
