Subject: Objection to Planning Application 2026/60/91494/E, Penistone Road, Birdsedg

Categories:

I object to the above planning application due to its impact on the wildlife in our area.

The following is an extract from the NBNA Atlas showing all species that have been found around my home address. The NBN Atlas provides a combination of the multiple sources of information about UK species and habitats, in a single location. It aims to facilitate learning about and understanding the UK's wildlife.

The following extract shows Mammals in the right hand viewing pane, but in total 791 species were recorded as being observed within 2 km of my home (which overlooks the planning application site).

This goes to show just how much wildlife there is in our area, and in the area that this planning application would effect.
