Subject: objection to planning 2026/91494, peniston road, Birdsedge

CAUTION: External email. Do not click links or open attachments unless you recognize the sender and know the content is safe.

I wish to formally object to the proposed development of 70 new house in birdsedge.
I strongly object to the loss of green belt land.
I object to this planning because it is agricultural land which is used for livestock. As the British summer is warming up and droughts are more common, land is becoming less productive to feed the country so more is needed to meet demand.

Furthermore with the current world unrest the UK needs to be more self-sufficient in growing your own food to feed the country which will not be possible if we keep building on green belt.

Birdsedge is a small rural village with no amenities and very limited bus services that would not support a working person without a car., The development of 70 houses will increase the size of the village by 40%. This is far beyond what could reasonably be considered a proportionate addition to the village.

The close proximity to local wildlife and ancient woodland upper dearnvally woods is of great concern. The woodlands are home to a great number of wildlife including red wood ants, bats
I have seen many of them in the green space around the village.

I respectfully ask the planning committee to refuse the application due to the reason mentioned above.
