1 PURPOSE AND AIMS

The purpose of this report is to identify the results of a desk study and site reconnaissance to establish potential sources of contamination which may affect the redevelopment of the site. Any pollutants identified will be assessed against a conceptual model to identify if there is a potential linkage with potential receptors.

The aim of the report is to allow Kirklees Council to assess the site in accordance with *Planning Policy Statement 23: Planning and Pollution Control (PPS 23)* published by the Office of the Deputy Prime Minister.

2 Site Location and Layout

2.1 Site Location

The site is located approximately 2.0km south east of Batley town centre at Grid reference SE251234. To the north is The Business and Technology Centre office park, to the west Mill Lane, to the south and east residential dwellings. The site location plan is shown in Figure 1

2.2 Site Description

The site occupies a level area between Mill Lane and the Heaton Grange Housing Development. The site is currently unoccupied, consisting of rough grassed areas with small trees to the southern and western boundaries.

The proposed site plan is included in Appendix A.

Figure 1. Location Plan

3 Site History

A Landmark Information Group Envirocheck Report has been obtained for the site and is included in Appendix B.

The earliest mapping available is the 1854 County Series map at 1:10,560 scale

The site history is:

	On Site	Nearby
1854	Undeveloped	Railway Line and Mill Lane to the west of the site with Union Mills and mill pond beyond. Quarry to the south west. Masonic Villa to the east.
1893	Little Change	Gas Works, Greenhill Mills and Tramline to the north. New houses to the south (Carr Street and Royd Street) and opposite Mill Lane. Quarry no longer shown, with new Crane Quarry beyond.

	On Site	Nearby
1907	Little Change	Gas Works shown as Batley Corporation. Additional houses adjacent to Royd Street.
1922	Little Change	Crane Quarry no longer shown.
1933	Little Change	Tramway no longer shown.
1956	Little Change	Additional structures shown to the north and east.
1962	Little Change	Gas Works reduced and part occupied by Viaduct Works. Greenhill Mills expanded.
1966	Little Change	Little Change
1972	Little Change	Little Change
1977	Little change	Little Change
1992	Little change	Little Change
1995	Little Change	Gas Works and Viaduct Works not shown, with Business and Technology Centre occupying the site. Additional housing to the south east.
2000	Little Change	Business and Technology Centre expanded. Heaton Grange to the east.
2011	Little Change	Greenhill to the East

Figure 2 shows the key historical potentially contaminative features overlaid on the present day map. The key features are:

4.1 Geology

The site is in an area which may be affected by coal mining activity. However the attached coal mining report from the Coal Authority show that the site is in an area which is not likely to be affected by past, present or future workings (see Appendix C).

The site does not fall within a brine compensation or brine subsidence solution area.

The site is unaffected by ground stability hazards caused by compressible ground, running sand and shrinking or swelling clays. There is a very low potential for landslide ground stability hazards however this is unlikely to affect the site.

Figure 3. Plan Showing Bedrock and Faults

4.2 Hydrogeology

The site is underlain by a Minor Aquifer (Variably permeable). Although not producing large quantities of water for abstraction, these are important for local supplies and in supplying base flow to rivers. A worst case Soils of High Leaching Potential (U) and vulnerability classification (H) are assumed, until proved otherwise.

The site is not located within a source protection zone.

There are three recorded groundwater abstraction points within 250m of the site and two within 500m. It is unlikely that these will affect the site.

4.3 Hydrology

Batley Beck is located to the west of the site.

The site is not on a floodplain, flooding from rivers or sea without defences

4.4 Radon

The Radon Atlas of England and Wales shows that the site is not in an area where radon protection measures are required.

4.5 Pollution Incidents Affecting Controlled Waters

There are two recorded pollution incidents within 250m of the site and fifteen reported pollution incidents to controlled waters within 500m of the site, none of which would affect the site.

4.6 Discharge Consents

There are four discharge consents within 250m of the site and seven discharge consents within 500m of the site, none of which would affect the site.

5 Land Uses

5.1 Current Site Uses

The site is currently a rough grassed area with no existing potentially contaminative uses.

5.2 Historical Land Uses

The historical mapping shows that the site has been largely undeveloped from 1854. The Site Sensitivity Map records the site as a registered landfill until 1988.

However, the accuracy of this information should be confirmed on site, as the address given for the landfill Map ID 82, corresponds with the addresses given for landfill Map ID's 83 and 84 which are recorded on the site of the former Gas Works.

5.3 Surrounding Land Uses

The surrounding land is presently used for residential housing, and has been on a historical basis, with a Gas Works and Quarry formerly within 50 to 100m of the site.

5.3.1 Waste and Landfill Sites

The site is a recorded landfill, with one further site within 250m.

There is one BGS recorded landfill site within 2000m of the site.

There are two historical landfill sites within 250m of the site.

5.3.2 Potentially Contaminative Trade Uses

There are forty potentially contaminative trade uses within 250m of the site and forty seven within 500m of the site. None are likely to affect the site.

5.3.3 Potentially Contaminative Energy Uses

There are no potentially contaminative energy uses within 250m of the site.

5.4 Proposed Site Use

It is proposed to develop the site for residential use with domestic dwellings, associated parking and landscaping. There are some potential pathways for previous solid contamination to affect the building occupiers, construction workers and building materials.

6 Preliminary (Qualitative) Risk Assessment

6.1 Potential Sources of Contamination

The only potential sources of on-site contamination are from the recorded former site usage as a landfill.

The only potential source of off-site contamination is from the historic former usage of the adjacent sites.

6.2 Potential Pathways

The potential pathways for the contaminants identified are, direct contact, migration, ingestion or inhalation of solid or liquid contaminants, unless hard landscaping is provided to eliminate potential pathways.

6.3 Potential Receptors

Potential receptors are the underlying aquifer, occupiers, construction workers, structures and services and landscape planting

6.4 Conceptual Model

Hazard	Source	Pathway	Receptor	Risk
Solid contaminants	Former site usage	Direct contact, ingestion, inhalation	Occupiers, construction workers	Low
		Direct Contact	Structures and services	Low
		Migration	Groundwater	Low
		Direct contact	Landscaping	Low
Liquid contaminants	Former site usage	Groundwater	Occupiers, construction workers Structures and services Landscaping	Medium
Landfill and mine gasses	Former site usage	Migration of gas into buildings	Occupiers	Low
Radon	None	-	-	-

7 Recommendations for Intrusive Investigations

The objectives of an intrusive investigation will be to:

- Confirm the previous site use as a landfill.
- Identify the engineering properties of the near-surface strata, suitable for the design of foundations.
- Identify any groundwater.
- Establish gas monitoring to assess the extent and concentration of any ground gases, if required.

- Identify quantitatively if there is any contamination present, particularly addressing the potential contamination risks associated the former site usage or migrating contaminants from works associated with the site usage of the adjacent sites.

8 Scope of Report

This report is for the sole use of Britannia Construction and their immediate advisors in connection with the development of the subject site for replacement nursery building. It shall not be reproduced in whole or in part or relied upon by third parties for any use whatsoever without the express permission of Mason Clark Associates Ltd. Mason Clark Associates Ltd shall have no liability for any use of this report other than for the purposes for which it was originally prepared.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Report Section and Details	Page Number
Summary	-
The Summary section provides an overview of the data contained within the report, detailing the number of data set features or the existence of a data set in relation to the buffer selected. For ease of reference, the report is broken down into 4 sections of data: Mining and Natural Cavities Data, Historical Land Use Information (1:2,500), Historical Land Use Information (1:10,000) and Ground Stability Data (1:50,000).	
Mining and Natural Cavities Data	1
The Mining and Natural Cavities Data section features data sets related to the existence of mining areas and their potential hazards; and details of naturally formed cavities. Data sets within this section are not plotted, with the exception of BGS Recorded Mineral Sites and Potential Mining Areas which feature on the Historical Land Use Information (1:10,000) map.	
Historical Land Use Information (1:2,500)	5
The Historical Land Use Information (1:2,500) section contains data captured from analysis carried out by Landmark of 1:1,250 and 1:2,500 scale historical Ordnance Survey mapping, identifying areas where, historically, the land uses were potentially contaminative. For the purpose of this Envirocheck module, only historical data relating to mining and ground stability has been included and plotted on the corresponding Historical Land Use Information (1:2,500) map. This section also includes the Subterranean Features data set, which details various man-made and man-used underground spaces obtained from the Subterranea Britannica society.	
Historical Land Use Information (1:10,000)	7
The Historical Land Use (1:10,000) section covers data captured from the systematic analysis carried out by Landmark of 1:10,560 and 1:10,000 scale historical Ordnance Survey mapping dating back to the mid-19th century, identifying potentially contaminative past industrial land uses. For the purpose of this Envirocheck module, only data relating to mining and ground stability has been included and plotted on the accompanying Historical Land Use Information (1:10,000) map.	
Ground Stability Data (1:50,000)	11
The Ground Stability (1:50,000) section includes the BGS Geosure data suite, reporting features to 250m and plotted onto 3 separate maps. Also reported is brine subsidence, brine mining and salt mining data sets, of which Brine Pumping and Salt Mining Related Features are plotted, and subsidence insurance claims and insurance investigations data, which is not plotted.	
Motion Map Data (1:2,500)	13
The Motion Map Data (1:2,500) section contains data which is plotted to indicate long-term stability trends from analysis of satellite radar data.	
Historical Map List	14
The Historical Map List section details the historical mapping that has been analysed for your site, in relation to the Historical Land Use Information sections.

7	BGS Recorded Mineral Sites Site Name: Atlas Location: Warwick Road, Batley, West Yorkshire Source: British Geological Survey, National Geoscience Information Service Reference: 13378 Type: Opencast Status: Ceased Operator: Unknown Operator Operator Location: Not Supplied Periodic Type: Carboniferous Geology: Pennine Lower Coal Measures Formation Commodity: Common Clay and Shale Positional Accuracy: Located by supplier to within 10m	A12SW (SW)	714	1	424345 423160
8	BGS Recorded Mineral Sites Site Name: Lower Soothill Location: Lower Soothill, Batley, Yorkshire Source: British Geological Survey, National Geoscience Information Service Reference: 73851 Type: Opencast Status: Ceased Operator: Unknown Operator Operator Location: Not Supplied Periodic Type: Carboniferous Geology: Pennine Coal Measures Group Commodity: Coal - Deep Positional Accuracy: Located by supplier to within 10m	A14NE (E)	891	1	425920 423745
9	BGS Recorded Mineral Sites Site Name: Lower Soothill Location: Soothill, Batley, Yorkshire Source: British Geological Survey, National Geoscience Information Service Reference: 73857 Type: Opencast Status: Ceased Operator: Unknown Operator Operator Location: Not Supplied Periodic Type: Carboniferous Geology: Pennine Coal Measures Group Commodity: Coal - Deep Positional Accuracy: Located by supplier to within 10m	A18NE (N)	951	1	425351 424385
	Coal Mining Affected Areas Description: In an area which may be affected by coal mining activity. It is recommended that a coal mining report is obtained from the Coal Authority. Contact details are included in the Useful Contacts section of this report.	A13NW (NE)	0	2	425039 423447
	Mining Instability Mining Evidence: Inconclusive Coal Mining Source: Ove Arup & Partners Boundary Quality: As Supplied	A13NW (NE)	0	3	425039 423447
	Non Coal Mining Areas of Great Britain No Hazard				
10	Potential Mining Areas Name: Soothill Wood Ceased Operation: 1910 Commodity: Coal; Middleton Main; Blocking Bed; Brown Metal; Cannel; Flockton Reference: 8529 Alternate: Not Supplied Name/Mine: Not Supplied Custodian: Not Supplied	A13NW (NE)	0	4	425039 423447
11	Potential Mining Areas Name: Soothill Wood Ceased Operation: 1928 Commodity: Coal; Top Brown Metal or New Hards; Low Brown Metal or Old Hards; Black Bed Reference: 9394 Alternate: Not Supplied Name/Mine: Not Supplied Custodian: Not Supplied	A13NW (NE)	0	4	425039 423447
12	Potential Mining Areas Name: Chidswell and Shaw Cross Ceased Operation: 1907 Commodity: Coal; Cannel Reference: 8852 Alternate: Savile Name/Mine: Not Supplied Custodian: Not Supplied	A13SE (S)	36	4	425039 423377

Map ID	Details	Quadrant Reference (Compass Direction)	Estimated Distance From Site	Contact	NGR
13	Potential Mining Areas Name: Shaw Cross Ceased Operation: 1923 Commodity: Coal; Flockton Reference: 8026 Alternate: Chidswell Name/Mine: Killingercroft Alternate: Ridings Name/Mine: Sough Name/Mine: Not Supplied Custodian: Not Supplied	A13SE (S)	36	4	425039 423377
14	Potential Mining Areas Name: Babes in the Wood Ceased Operation: 1872 Commodity: Coal; Haigh Moor Reference: Not Supplied Alternate: Not Supplied Name/Mine: Not Supplied Custodian: Embleton, Barton and Stancliff, Central Bank Chambers, Leeds.	A14NW (E)	316	4	425395 423452
15	Potential Mining Areas Name: Soothill Upper Ceased Operation: Not Supplied Commodity: Coal Reference: Not Supplied Alternate: Not Supplied Name/Mine: Not Supplied Custodian: Not Supplied	A14NW (E)	316	4	425395 423452
16	Potential Mining Areas Name: Soothill Ceased Operation: 1930 Commodity: Coal; Haigh Moor Reference: 10091 Alternate: Babes in the Wood Name/Mine: Chidswell Alternate: Dogloach (Dogloatch) Name/Mine: Not Supplied Custodian: Not Supplied	A14NW (E)	316	4	425395 423452
17	Potential Mining Areas Name: Savile Ceased Operation: Not Supplied Commodity: Coal; Flockton Reference: Not Supplied Alternate: Not Supplied Name/Mine: Not Supplied Custodian: Embleton, Barton and Stancliff, Central Bank Chambers, Leeds.	A14SW (E)	321	4	425396 423382
18	Potential Mining Areas Name: Batley Carr Ceased Operation: Not Supplied Commodity: Coal Reference: Not Supplied Alternate: Not Supplied Name/Mine: Not Supplied Custodian: Not Supplied	A12SE (W)	419	4	424591 423371
19	Potential Mining Areas Name: Soothill Wood Ceased Operation: 1913 Commodity: Coal; Flockton Reference: 6090 Alternate: Not Supplied Name/Mine: Not Supplied Custodian: Not Supplied	A19SW (NE)	444	4	425391 423784
20	Potential Mining Areas Name: Savile Ceased Operation: 1901 Commodity: Coal; Joan Reference: 4138 Alternate: Flockton Name/Mine: Joan Alternate: Joan Name/Mine: Not Supplied Custodian: Not Supplied	A9NW (SE)	555	4	425401 422980

Map ID	Details	Quadrant Reference (Compass Direction)	Estimated Distance From Site	Contact	NGR
21	Potential Mining Areas Name: Batley and End West Ceased Operation: 1919 Commodity: Coal; Middleton Main Reference: 8420 Alternate: Brow Wood Name/Mine: Alternate: Rocha Name/Mine: Custodian: Not Supplied	A18NW (N)	710	4	424983 424181
22	Potential Mining Areas Name: Bankfoot Ceased Operation: 1882 Commodity: Coal; Cannel; Flockton Reference: Not Supplied Alternate: Not Supplied Name/Mine: Custodian: Engineer's Office, L.M. and S. Railway Company, Crewe.	A18NW (N)	710	4	424983 424181
23	Potential Mining Areas Name: Bankfoot Ceased Operation: 1881 Commodity: Coal; Stone; Black Bed Reference: Not Supplied Alternate: Not Supplied Name/Mine: Custodian: Kellett, Ellis, Walker and Rogers, 26 King Street, Wigan.	A18NW (N)	710	4	424983 424181
24	Potential Mining Areas Name: Cracken Edge Ceased Operation: Not Supplied Commodity: Coal Reference: Not Supplied Alternate: Not Supplied Name/Mine: Custodian: Not Supplied	A8SW (S)	841	4	425004 422572
25	Potential Mining Areas Name: Shaw Cross Ceased Operation: 1934 Commodity: Coal; Old Hands Reference: 11245 Alternate: Chidswell Name/Mine: Alternate: Ridings Name/Mine: Custodian: Not Supplied	A9NE (SE)	853	4	425803 422985
26	Potential Mining Areas Name: Batley Ceased Operation: Not Supplied Commodity: Coal Reference: Not Supplied Alternate: Not Supplied Name/Mine: Custodian: Not Supplied	A12NW (W)	869	4	424184 423788

Index Map

For ease of identification, your site and buffer have been split into Slices, Segments and Quadrants. These are illustrated on the Index Map opposite and explained further below.

Slice
Each slice represents a 110,000 grid area (7.7m x 2.7m) for your site and buffer. A slice may be made up of one or more adjacent grid squares (represented by a red outline). The red outline represents the slice boundary. The grid lines at the bottom left corner of the slice '000'. This grid does not extend to National Grid lines but is designed to give best fit over the site and buffer.

Segment
A segment represents a 12,500 grid area. Segments that have plot lines associated with them are shown in dark green, others in light blue. These are numbered from the bottom left hand corner within each slice.

Quadrant
A quadrant is a quarter of a segment. These are labelled as NW, NE, SW, SE and are referenced in the database to allow features to be quickly located on plots. Therefore a feature that has a quadrant reference of A7NW will be in Slice A, Segment 7 and the NW Quadrant.

Yorkshire

Published 1893 - 1894

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale selected for England, Wales and Scotland in the 1840's. In 1894, the 1:2,500 scale was adopted for mapping urban areas and by 1900 it had been used for the whole of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in adjoining areas.

Yorkshire

Published 1907

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the National Library of Scotland. Maps were scanned in the UK in 1994 at a scale of 1:2,500 and are suitable for mapping urban areas and by roads. The maps were scanned at a resolution of 300dpi and are suitable for mapping urban areas and by roads. The published data shown below is shown some years later than the surveyed data. Before 1938, all OLS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in collating areas.

Yorkshire
Published 1922

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1898 it was extended to cover the whole of the country. The maps were compiled by the Ordnance Survey and were considered to be the 'authoritative' maps of the time. The Ordnance Survey maps were compiled from the original survey data. Between 1918 and 1922 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

**Additional SIMs
Published 1981**

Source map scale - 1:1,250

The SIMs (Ordnance Survey's 'Survey of Information on Microfilm') are a series of maps of the United Kingdom which were produced and published in 1981. They contain information on buildings, roads, and land use. These maps were produced at both 1:2,500 and 1:1,250 scales.

Large-Scale National Grid Data

Published 1997

Source map scale - 1:1,250

Large Scale National Grid Data (superseded data) contains (Ordnance Survey's 'Survey of Interim Grid Coordinates') in 1992, and continued to be produced until 1997. These maps were the first series of digital mapping and so provide detailed information on features and roads, but tend to show less topographic detail such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Yorkshire

Published 1854 - 1855

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held in the 1:2,500 scale for England, Wales and Scotland in the 1840's. In 1954 the 1:2,500 scale maps were reissued and the 1:10,560 scale maps were used to update the 1:10,560 maps. The published data given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in adjoining areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unaltered - with all military camps and other strategic sites removed. These maps were issued overprinted with the National Grid. In 1950, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Yorkshire

Published 1894 - 1895

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the National Library of Scotland. The maps were published in 1894 and 1895, and are the only maps of the area published at this scale. The maps were used to update the 1:10,560 maps. The published date given on the map is often some years later than the surveyed date. Between 1900 and 1905, maps were based on the Cassini projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in surveying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first revision process commenced and in 1975, with new editions appearing every 10 years or so for urban areas.

Yorkshire Published 1908

Source map scale - 1:10,560

The historical maps shown were reproduced from maps originally held at the National Library of Scotland, Edinburgh, in 1840's. In 1854 the 1:250,000 scale maps were added for reference. These maps were used to update the 1:10,560 maps. The published data given therefore is often some years later than the surveyed data. Below 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in adjoining areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unaltered - with all military camps and other strategic sites retained. These maps were initially overprinted with the National Grid. In 1970, the final 1:10,560 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Hendon Grange, BATLEY, West Yorkshire, WF17 6EN

Yorkshire Published 1938 Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1954 the 1:2,500 scale was adopted for mapping urban areas. These maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with subsequent surveys of a single area being carried out in different years. The maps were then updated to the 1:10,560 scale in the late 1940's, a Provisional Edition was published. These maps were mainly based on a number of sources. The maps were then updated - with all military camps and other oblique sites removed. These maps were then reprinted using the National Grid in 1971. The first revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Ordnance Survey Plan Published 1955 - 1957

Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1860s. In 1954 the 1:50,000 scale was adopted for mapping urban areas, these maps were used to update the 1:10,000 maps. The published date given therefore is often some years after the surveyed date. Before 1957, all OS maps were based on the Cassini Projection, with independent surveys of a single area. In the late 1940s, a Universal Transverse Mercator (UTM) projection was introduced, which updated the 1:10,000 mapping from a number of sources. The maps appear unaltered - with all railway camps and other straight lines removed. These maps were initially overlaid with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The re-plot process continued until recently, with new editions appearing every 10 years or so for urban areas.

Batley

Published 1983

Source map scale - 1:10,000

These maps were produced by the Russian military during the Cold War between 1960 and 1997, and cover 103 towns and cities throughout the U.K. The maps are produced at 1:25,000, 1:10,000 and 1:5,000 scales, and show detailed land use, with colour-coded areas for development, green areas, and developed areas. Buildings are coloured black and important buildings are numbered. The maps are produced by the Russian military, as well as strategic military sites and transport hubs, for use if they were to have invaded the U.K. The detailed information provided indicates that the areas were surveyed using land based personnel, on the ground, in the areas that are marked.

10k Raster Mapping

Published 2000

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey 1:10,000 colour raster mapping. These maps are derived from Landspan which replaced the old 1:10,000 maps originally published in 1970. The data is highly detailed showing buildings, fences and field boundaries as well as all relevant road network and watercourses. The maps also include topographical features such as contour lines, vegetation, and other features. The maps are produced by the Ordnance Survey, a government-owned mapping agency, and are available for purchase from the Ordnance Survey website.

Geology 1:50,000 Maps

This report contains geological map extracts taken from the BGS Digital Geological map of Great Britain at 1:50,000 scale and is designed for users carrying out preliminary site assessments who require geological maps for the area around the site. This mapping may be more up to date than previously published paper maps.

The various geological layers - artificial and landslide deposits, superficial geology and solid (bedrock) geology are displayed in separate maps, but superimposed on the final 'Combined Surface Geology' map. All map legends feature on this page. Not all layers have complete nationwide coverage, so availability of data for relevant map sheets is indicated below.

Superficial Geology

Superficial Deposits are the youngest geological deposits formed during the most recent period of geological time, the Quaternary, which extends back about 1.8 million years from the present.

They rest on older deposits or rocks referred to as bedrock. This dataset contains Superficial deposits that are of natural origin and 'in place'. Other superficial strata may be held in the Mass Movement dataset where they have been moved, or in the Artificial Ground dataset where they are of man-made origin.

Most of these Superficial deposits are unconsolidated sediments such as gravel, sand, silt and clay, and often they form relatively thin, often discontinuous patches or larger spreads.

Bedrock and Faults

Bedrock geology is a term used for the main mass of rocks forming the Earth and are present everywhere, whether exposed at the surface in outcrops or concealed beneath superficial deposits or water.

The bedrock has formed over vast lengths of geological time ranging from ancient and highly altered rocks of the Proterozoic, some 2500 million years ago, or older, up to the relatively young Pleistocene, 1.8 million years ago.

The bedrock geology includes many lithologies, often classified into three types based on origin: igneous, metamorphic and sedimentary.

The BGS Faults and Rock Suppression dataset includes geological faults (e.g. normal, thrust), and thin beds mapped as lines (e.g. coal seam, gypsum bed). Some of these are linked to other particular 1:50,000 Geology editions, for example, coal seams are part of the bedrock sequence, most faults and mineral veins primarily affect the bedrock but cut across the strata and just date its deposition.

Non-Residential Coal and Brine Report

Site At, 1 Heaton Grange, Batley, West Yorkshire

This report is based on and limited to the records held by, the Coal Authority, and the Cheshire Brine Subsidence Compensation Board's records, at the time we answer the search.

Coal mining	Yes
Brine Compensation District	No

Information from the Coal Authority

Underground Coal Mining

Past

The property is in the likely zone of influence from workings in 2 seams of coal at 150m to 330m depth, and last worked in 1965.

Any ground movement from these coal workings should have stopped by now.

Present

The property is not in the likely zone of influence of any present underground coal workings.

Future

The property is not in an area for which the Coal Authority is determining whether to grant a licence to remove coal using underground methods.

The property is not in an area for which a licence has been granted to remove coal using underground methods.

All rights reserved. You must not reproduce, store or transmit any part of this document unless you have our written permission.

The property is not in an area that is likely to be affected at the surface from any planned future workings.

However reserves of coal exist in the local area which could be worked at some time in the future.

No notice of the risk of the land being affected by subsidence has been given under section 46 of the Coal Mining Subsidence Act 1991.

Mine entries

There are no known coal mine entries within, or within 20 metres of, the boundary of the property.

Records may be incomplete. Consequently, there may exist in the local area mine entries of which the Coal Authority has no knowledge.

Coal-mining geology

The Authority is not aware of any evidence of damage arising due to geological faults or other lines of weakness that have been affected by coal mining.

Opencast Coal Mining

Past

The property is not within the boundary of an opencast site from which coal has been removed by opencast methods.

Present

The property does not lie within 200 metres of the boundary of an opencast site from which coal is being removed by opencast methods.

Future

The property is not within 800 metres of the boundary of an opencast site for which the Coal Authority is determining whether to grant a licence to remove coal by opencast methods.

The property is not within 800 metres of the boundary of an opencast site for which a licence to remove coal by opencast methods has been granted.

Coal-mining subsidence

The Coal Authority has not received a damage notice or claim for the property since 31 October 1994. There is no current Stop Notice delaying the start of remedial works or repairs to the property.

The Authority is not aware of any request having been made to carry out preventive works before coal is worked under section 33 of the Coal Mining Subsidence Act 1991.

Mine gas

There is no record of a mine gas emission requiring action by the Coal Authority within the boundary of the property.

Hazards related to coal mining

The property has not been subject to remedial works, by or on behalf of the Authority, under its Emergency Surface Hazard Call Out procedures.

Withdrawal of Support

The property is not in an area for which a notice of entitlement to withdraw support has been published.

The property is not in an area for which a notice has been given under section 41 of the Coal Industry Act 1994, revoking the entitlement to withdraw support.

Working Facilities Orders

The property is not in an area for which an Order has been made under the provisions of the Mines (Working Facilities and Support) Acts 1923 and 1966 or any statutory modification or amendment thereof.

Payments to Owners of Former Copyhold Land

The property is not in an area for which a relevant notice has been published under the Coal Industry Act 1975/Coal Industry Act 1994.

Information from the Cheshire Brine Subsidence Compensation Board

The property lies outside the Cheshire Brine Compensation District.

Additional remarks

This report is prepared in accordance with the Law Society's Guidance Notes 2006, the User Guide 2006 and the Coal Authority and Cheshire Brine Board's Terms and Conditions 2006. The report is compliant with Home Information Pack requirements.

The Coal Authority owns the copyright in this report. The information we have used to write this report is protected by our database right. All rights are reserved and unauthorised use is prohibited. If we provide a report for you, this does not mean that copyright and any other rights will pass to you. However, you can use the report for your own purposes.
