

## **Appendix A – Climate Change Statement**

### **Climate Change Statement for Planning Applications**

#### **Part 1: Applicant details**

Name of applicant/agent	Mr Ryan Fisher / Mr Mark Scatchard
Site Address	9 Church Lane, Mirfield. WF14 9HU.
Description of Development	Proposed two storey side extension; forming store, utility / W.C, playroom and bedroom.

#### **Part 2: Climate Change Mitigation measures**

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
Insulation levels will be provided to comply with or exceed Building regulations.
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
All materials removed during demolition will be removed and recycled where possible. New materials will be sourced from local suppliers where possible to limit impacts of transportation wherever possible.
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

Renewable energy is an option available for client to use from their electricity supply

Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)

Advice will be taken from the SAP company to limit overheating when we get to Building regulations stage.

Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)

Site is not in a flood zone.

Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)

Water stress will be similar to that of the existing property.

Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)

Due to the limited nature of the extensions to the footprint there will be little impact on biodiversity.

Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)
