

Consultation Response from KC, Ecology Unit
2026/91625 adj, 49, Hopton Lane, Mirfield, WF14 8JP
Erection of detached dwelling with associated access and parking
Date Responded: 25/06/2026 Responding Officer: Z. Hanshaw Responding Ref: 2606/73

Good afternoon,

I have reviewed the Preliminary Ecological Appraisal (PEA) (Estrada Ecology, December 2025) and I am satisfied with the information contained within. The report states that the building to be demolished has negligible potential for roosting bats, and all trees onsite are to be retained. I would recommend that the mitigation measure mentioned in the report are detailed in a Construction Environmental Management Plan: Biodiversity which should be secured as a condition of any consent. This should also include details for the removal and control of the Rhododendron, a Schedule 9 Invasive Non-Native Species.

I would also recommend that reasonable enhancements for biodiversity are included in any proposals. A Biodiversity Enhancement Management Plan to include the final details and layout of the enhancements included in Section 7 of the PEA should be secured as a condition of any consent.

Recommended conditions

Lighting strategy

No works are to commence unless a detailed lighting scheme, developed in accordance with established guidance (e.g. Bat Conservation Trust and Institute of Lighting Professionals (2023) Bats and Artificial Lighting at Night), has been drafted and agreed with the council. The Sensitive Lighting Strategy will demonstrate that the proposed lighting will not impact upon ecological networks and/or sensitive features. Thereafter the agreed lighting scheme shall be implemented, subject to any variations approved in writing by the planning authority. All external lighting shall be installed strictly in accordance with the specifications and locations set out within the Lighting Strategy.

Reason: In the interests of biodiversity and in accordance with Policy LP30 and NPPF15

Construction Environmental Management Plan for Biodiversity

No works shall take place until a Construction Environmental Management Plan (CEMP: Biodiversity) has been submitted to and approved in writing by the local planning authority. The CEMP (Biodiversity) shall include the following:

- a) Summary of potentially damaging activities
- b) Identification of "biodiversity protection zones"
- c) Practical measures (both physical measures and sensitive working practices) to avoid or reduce impacts during construction (these may be provided as a set of method statements)
- d) The location and timing of sensitive works to avoid harm to biodiversity features.
- e) The times during construction when specialist ecologists need to be present on site to oversee works.
- f) Responsible persons and lines of communication.

g) The role and responsibilities on site of an ecological clerk of works (ECoW) or similarly competent person.

h) Use of protective fences, exclusion barriers and warning signs.

The approved CEMP: Biodiversity shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details, unless otherwise agreed in writing by the local planning authority.

The CEMP must also include the following specific plans / documents:

- Pollution Prevention Plan for the watercourses and waterbodies (using good practice guidance such as CIRIA C532)

Reason: In the interests of biodiversity and in accordance with LP30 and NPPF15

Tree protection

A Hedgerow and Tree Protection Plan detailing measures for the protection of trees and hedgerows during the works will be submitted to and approved by the LPA prior to the commencement of works on site, including site clearance and delivery of materials.

Hedgerow and tree protection measures will include temporary fencing for the protection of hedgerows in accordance with BS 5837:2012 Trees in relation to design, demolition and construction – Recommendations. Any alternative fencing type or position not in accordance with BS 5837:2012 will be agreed in writing by the LPA prior to the start of development.

The root protection fencing will define the works exclusion zone around hedgerows and trees. Activities liable to be harmful to hedgerows and trees are prohibited within this exclusion zone, unless agreed in writing with the LPA. The approved hedgerow and tree protection measures will remain in place until the completion of development or unless otherwise agreed in writing with the LPA.

Reason: In the interests of biodiversity and in accordance with Policy LP30 and NPPF15

Biodiversity Enhancement Management Plan

A Biodiversity Enhancement Management Plan (BEMP) must be provided to the LPA prior to the commencement of above ground works on-site. The content of the BEMP shall include the following.

- Purpose and conservation objectives for the proposed enhancement measures
- Detailed designs to achieve the stated objectives
- Location of the proposed enhancement measures
- Persons responsible for implementing the enhanced measures
- Details of initial aftercare and long-term maintenance.

Reason: In the interests of biodiversity and in accordance with Policy LP30 and NPPF15
