More houses will surely need the correct electrical substation as for a very small village we have a lot of power cuts which effects not only homes but businesses. Even tho there are only a few businesses to see. Butchers shop x 2, Farms, Public House/restaurant, Hair Salon & holiday cottages, A lot of people work from home in this village & it causes a lot of stress, mental health issues when we can't go about our business as we should. Drainage needs to be addressed starting with the old pipe work that was put down many years ago thinking Hade Edge would never grow. It is clearly far too small for the capacity the village is now. I believe you have a duty of changing and upgrading the old as well as the new to ensure less flooding areas. Less sewage problems we have occurred since the start of the development. Can the entrance to the site come off the Boshaw View estate already. The entrance onto the very small already extremely busy school rd (Greave Rd) will not take the extra load. And is still extremely close to a junction which is a struggle at the best of times. Also I'd like you to consider the amount of houses. Maybe less and a better quality would be the better alternative. Many people I know that live on Boshaw View have constantly struggled to get work men back to put right what is wrong. Says to me poor workmanship on these extremely unaffordable properties. Thank you for taking the time out to read my comments and look forward to you put measures in place to make the build a positive impact on the village not a negative like it as up to press.
