<p>This will affect the sunlight coming into my garden. When I walk into my garden now I don't get enough light into my garden. I use the area for gardening and could not do so this year because of the light. I could not do so also because of how the noise affects my health now. The noise has been occurring for a whole year now and has been affecting me continuously. It has been hugely disturbing to me. I have told environmental pollution about this and has affected my life that I cannot live continuously in my house as the noise has started early and ended late and this will continue this noise.</p> <p>I believe it is unfair that my garden will be in the dark for most of the day during the summer affecting my living as much as the noise has which appears to continue for a long time affecting my ability to live. There are many things I can no longer do in my own house due to the extensive noise, drilling, hammering which occurs without me knowing.</p> <p>I hope that you can help in this matter.</p> <p>Thank You</p>
