**2026/91763 - Land off Barnsley Road, Denby Dale, Huddersfield,
Erection of 40 residential dwellings and associated works**

Dear Ellie

Thank you for the email of the 4th of August 2026, consulting WYAAS on application 2026/91763 for the proposed erection of 40 residential dwellings.

We have checked the site against the West Yorkshire Historic Environment Record (HER) and our previous consultation records for this parcel of land (application 2023/91564).

The site comprises undeveloped greenfield land with no recorded past industrial or archaeological activity. Consequently, there are currently no known significant archaeological implications associated with this proposed development.

In this instance, WYAAS does not recommend any archaeological evaluation or monitoring works.

Sincerely,
David Williams
WYAAS Team Manager
