Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
Your comment This development is now considerably larger than previously submitted. BARNSELY RD already has speed issues over the stipulated speed limit and more vehicles egressing will add to issues of line of sight and vehicles approaching. he use of reconstituted stone, whilst similar to the 1960 / 1970 estate is totally out of step and tone with wider local setting. The most recent development has full quality yorkshire sandstone as does the heritage buildings locally. The field currently has various wildlife corridors and foxes and Deer are regularly seen. There is a thriving Bat and bird of prey presence that must be monitored and protected. The plans are misleading as the Sub Station is displayed in different locations on different plans.
