

DOWKER STREET, HUDDERSFIELD. PRE-COM COND 10 - CULVERT SURVEY
JULY 2025

Hi Westshield

As discussed, we have surveyed the Longwood Brook Culvert up to the point of deep water which was also fast flowing. Unfortunately, at the time of the survey the water was above waist height. To complete the water level would need to come down in order for the team to continue walking through safely.

The condition survey couldn't be completed with a crawler system due to the water and debris/rubble also a floatation device couldn't be used again due to the debris/rubble.

If you require anything further, please let me know.

Kind Regards,

Ian Thompson
