As a parent involved in the club, I wholeheartedly support this planning application because a 3G pitch would make a huge difference to our children and the wider community. Week after week we see training cancelled and matches postponed because the grass pitches are waterlogged, leaving the kids disappointed and without a safe, reliable place to play. This development uses the site in a thoughtful way that fits the character of the area, respects the surrounding landscape and trees, and doesn't harm neighbouring homes in terms of privacy, daylight or noise. It won't create issues for traffic or highway safety, and the layout sits comfortably within the existing environment. For our children, this isn't just a pitch — it's the chance to play consistently, stay active, feel part of a team and grow in confidence. This 3G facility would be a vital asset for families, the club and the whole community who rely on having a dependable space for sport all year round.
