

TREE ①

Ash tree
early signs of ash die back
Cut back large overhanging branches.

TREE ②

Ash tree
early signs of ash die back
This tree grows right out over the road is through telephone lines right on a telegraph pole
We need to cut this tree right back to garden level so it is manageable and right out of the road and away from all telegraph and service lines

TREE ③

Ash tree
early signs of ash die back
Very tall thin single trunk
We need to cut this tree right back to garden level so it is manageable and poses no danger.

TREE ④

Ash tree
early signs of ash die back
This tree grows right out over the road through telephone lines
We need to cut this right back to garden level so it is manageable and right out the way of telephone lines and services.

TREE ⑤

UNKNOWN SPECIES TREE
This tree grows through the telephone lines straight out over the road and is very close to the road wall.
This tree needs to be felled.

TREE ⑥

SILVER BIRCH TREE
This 3 bough tree has one bough which grows straight out over the road and through the telephone lines
We propose to keep the tree but lose the bough that is obstructing lines and the road.

TREE ⑦

Ash tree
early signs of ash die back
This tree is very close to the road and is a tree that has been left and got out of Control. We propose to fell this tree.

TREE ⑧

Ash tree
Showing signs of Ash die back.
This tree is very close to the road and is leaning badly towards the road.
The trunk has splits in it and it looks in ill health.
We propose to fell this tree.
