

Appendix A – Climate Change Statement

Climate Change Statement for Planning Applications

Part 1: Applicant details

Name of applicant/ agent	Al Hashim Academy
Site Address	Broughton House, Cambridge Street, Batley, WF17 5JH
Description of Development	Proposed solar panels

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:

Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)

solar panels

Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)

retain and refurbish all of existing building.

Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

solar panels

Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)

No change to building design and layout. Natural light is maximised in the building. minimal change to existing building.

Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)

The site is not in a flood zone

Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)

Water efficient sanitaryware

Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)

This is a whole urbanised site. The application is to establish principle of COU only. No physical development is proposed

Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)

Locally source materials to reduce transport emissions.
