Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
The site, although a brown field site is surrounded by the greenbelt. The NPPF states urban sprawl, preservation of settings and special character and ultimately aims to the openness and permanence of the greenbelt. This development would have a significant impact in this regard. In addition, the road is a 'rat run' out of Honley and used by significantly more and more than it was intended to be. Significant development of the highway would be required to ensure the safety of entry and exit from the site, existing traffic but also pedestrians.
