Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	No
I was brought up in Gomersal and my parents still live there, Gomersal is a small semi rural village not a town as stated on the plans. Cliff lane where the proposed access is to take place, is a narrow country lane and is not suitable for the additional traffic this development will create which will not only impact local residents but also wildlife that has habitat in the area including bats which are a protected species. These plans were approved under the previous Labour council who gave no consideration to the people, local area, wildlife or local infastructure for Gomersal. Our schools are over subscribed, there are no nhs dentists and limited places for doctors not to mention limited public transport links. This is green belt land adjacent to Fanwood Scout & Guide Campsite and safe guarding must also be considered for the safety of the young people who use this facility on a daily basis! There is more to planning than meeting government quotas. With the 280 houses being built at Merchant fields Hunsworth, further homes being built at Birkenshaw roundabout where is everyone supposed to go, the whole area will be gridlocked, I implore the new Reform administration to think again about inflicting this development on us.
