2. July 2026.

To whom it may concern,

I Farm the land and look after the cattle for Mr Singh. I make the hay and or silage and do the ground work on the land. It would be very beneficial to have a shed to house the equipment needed to tend the land and to house the cattle and all the animal husbandry equipment that is needed to care for them to the high standards that is required of all livestock owners of today, especially during winter when the cattle can damage the land when it is wet and most importantly for their welfare.
