20 Series - Demolition Notes

Demolition Key

 Red Hatch / Line indicates elements for removal / demolition

All demolished materials and associated elements are to be taken down / removed from site completely (where applicable) and interfaces to be made good to match the existing.

 Existing / Retained

General Notes

The contractor is to carry out all demolition works in accordance with BS6187:2011 and provide all necessary temporary supports as required in line with structural engineers requirements.

All redundant materials should be fully removed from site in accordance with the Site Waste Management Plan Regulations.

Refer to Site Waste Management plan for details of removal and recycling of all materials on site. It is requested that the contractor allow for recycling of all materials removed from site where possible.

Supply and maintain all site fencing throughout the contract, all necessary secure fencing and hoarding to the perimeter of the site to prevent unauthorised access.

Provide all necessary protective boarding and partitioning to prevent accidental damage to adjacent windows and building structure.

Provide all necessary temporary structures and sheeting to prevent the ingress of water to the retained structure at all times.

Leave all relevant statutory authorities and utility providers in respect of all works affecting these services.

Strip out all redundant mechanical and electrical fixtures and fittings in accordance with Mechanical & Electrical drawings. Adapt all existing wiring and service feeds to supply new appliances and fittings.

Maintain a safe, secure working environment for all site operatives and visitors in accordance with all relevant and current health and safety, codes of practice and CDM regulations and legislation.

Include for all necessary excavation works for new foundations, drainage and changes in existing ground levels where appropriate. Allow for carefully exposing all existing below ground services and undertake protecting or protection works as described on the contract drawings as required.

Provide all relevant health & safety, security and considerate construction signage as may be required.

Note: drawings to be read in conjunction with all the relevant packages.

- Existing Plans
- Proposed Details
- Refurbishment Strategy Drawings
- LBC Details
