My objections to this planned development

Access is via a road which

is quite narrow and has cars parked most of the time on one side of the road. One has to drive very carefully to avoid the cars, delivery vehicles often double park so the driver does not have to walk a longer distance. It is very very difficult for pedestrians to cross the road even when standing on the road between 2 parked cars visibility is limited

Mount Road the main access has cars parked either side and is a bus route. Workers vehicles are often large especially delivery vehicles with building supplies. If the build takes place there will be a horrific disruption of everyday traffic and a big risk of accidents to pedestrians and drivers.

Access for ambulances and fire appliances very precarious during and after the build. Mount Road is already congested with 40 vehicles at least one per household (usually 2 per household, parcel delivery vehicles, food deliveries will lead to congestion on

Mount Road and Netherley. Those fields have diverse wildlife which will be disturbed during the build.

I do not think that the animals will be easily rehoused on new

man-made hillocks or be able to find their way to man-made wooden refuges.

All of which is only a small part of my objections but you will not want a longer letter.

I would've delighted to attend a planning meeting about this application

4 Rectory Close Marsden.
