I object due to the following concerns. The fields that run along the back of Mount Rd contain a large population of wildlife, ranging from deer, fox, badger, owl and many more. The building of these dwellings would destroy their habitat and move them on out of the area. Adding 10 homes along with the possible 40 people to fill them would put even more strain on the water and sewage ways that seem to be bursting every other week. With pipes bursting, the road closes leaving people either stuck above or below the damage with no choice but to travel all the way around Manchester Road. Parking around Netherley Drive has been an issue over the past few years. Throughout winter this problem is multiplied as it's a safe flat area for people to leave their cars in the snow. There simply isn't room for a potential 30+ cars to park when this happens.
