

CLIMATE CHANGE STATEMENT

location	Spring Cottage, 313 Greave Road, Hade Edge, Holmfirth, HD9 2DF.
application	Demolition of Side Outshot & Front Conservatory and Erection of Extensions and Alterations
client/applicant	D Haley + R Heap
job number	26/1350
date	July 2026

ARCHITECTURE | PLANNING | DESIGN

Malkin Farm
Brow Lane
Holmfirth

Company Registration Number: 09898149 - Company Registered in England and Wales

Part 1: Applicant details

Name of applicant/agent	Agent – Paul Matthews Architectural Applicant – D Haley + R Heap
Site Address	Spring Cottage, 313 Greave Road, Hade Edge, Holmfirth, HD9 2DF.
Description of Development	Demolition of Side Outshot & Front Conservatory and Erection of Extensions and Alterations

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
The works are subject to a Building Regulations application where compliance will be required. The proposals will provide a more thermally efficient property by encapsulating inefficient parts of the existing dwelling with thermally efficient extensions.
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
Sub-contractors and materials will be sourced locally, where possible.
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

Materials to be used (Natural Stone, Blockwork, Glass and Timber) are wholly recyclable.

Solar panels are proposed to the South Facing extension roof slope.

An EVCP is incorporated to the proposed replacement detached garage

Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)

The proposals will present a more energy-efficient dwelling for the future as a result of the design encapsulating part of the existing property with a significantly higher thermal efficiency.

Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)

Flood risk does not apply to this application

Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)

Low water consumption appliances will be used within the proposed development.

Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)

Not applicable on this application.

Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)

An EVCP is incorporated to the proposed replacement detached garage to promote the use of electric vehicles as opposed to combustion engines.

Appendix B – Further information

Kirklees Local Plan

The development plan for the Kirklees Council area (www.kirklees.gov.uk/localplan)

Planning applications guidance and advice notes
