

Our Ref: 678822.DF.26

Premises - Kwik Fit, New North Road, Huddersfield, HD1 5QR

Works – Dead and in decline trees

Scope

As indicated on the attached plan, there are dead and in decline trees on site, and stem that has fallen. The trees have been identified by numbers:

- T1 – small dead stem within the tree belt
- T2 and T3 – 2nr dead sycamore trees
- G4 – Group of 3nr dead stems
- G5 – 2nr ash stems that are covered in ivy and in decline
- T6 – fallen stem

Due to the condition of the trees the team will use a MEWP to gain safe access to dismantle the trees.

Cones and signage will be erected to form traffic management for work on G4 and G5.

Method

Ground Control will provide a certified team to carry out the following work:

- With the use of a MEWP, the team will access each tree indicated on the plan and shown in the photographs. Then using a chainsaw will section fell the trees to ground level. The limbs will be lowered into a designated drop zone.
- The team will erect signs and cones whilst working on the roadside.
- The team will cut up the fallen stem and remove from the site.
- The waste will be processed through a woodchipper and removed from the site for suitable disposal.

Services we offer- Landscape Construction, Arboriculture, Winter Maintenance, Pothole Repairs, Electric Vehicle Charge Point Installations, Treatment of Invasive Weeds and Design.
