I've already submitted once but have more to add This area round Grange Moor primary school-right next to the proposed building site is already part of a county wide traffic consultation being led by the Mayor. People who live locally have already completed questionnaires about the local traffic and impact of school traffic and safety around this road. Whilst this is ongoing I don't see how you can grant planning to increase the amount of traffic in this area. The house which is to be demolished has a bat population. All bat roosts are protected by the Conservation of Habitats and Species Regulations 2017 Bats receive the highest level of protection under our law.
