Company Registration Number: 09898149 - Company Registered in England and Wales

Part 1: Applicant details

Name of applicant/agent	Agent – Paul Matthews Architectural Applicant – Mr A Martin
Site Address	Stalley Royd Farm, Jackson Bridge, Holmfirth, HD9 7HX
Description of Development	Conversion of 1 Dwelling to 2 Dwellings (Listed Building)

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
<p>The works are subject to a Building Regulations application where compliance will be required. NB this is a listed building so comes with restrictions.</p> <p>TRV's will be fitted to all radiators.</p> <p>All new lighting will be LED low energy lighting.</p>
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
<p>Sub-contractors and materials will be sourced locally, where possible. Minimal built intervention allows for the addition of a new dwelling with minimal construction. The Existing dwelling is effectively being reused efficiently.</p>
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)
<p>Materials to be used are minimal and are wholly recyclable.</p> <p>An EVCP will be incorporated adjacent to the proposed parking area to encourage the use of electric vehicles.</p>

Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)

N/A – the proposal reinstates a historic layout in connection with the original use of the heritage asset.

Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)

Flood risk does not apply to this application.

Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)

Low consumption appliances will be used for the project.

Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)

Not applicable on this application.

Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)

Not applicable on this application.
