The site plan with the application show site boundary that are not in line with true property boundaries with fences. The proposed extension will be very close to the rear fence. The proposed extension is very large increase in the current footprint of house and a massive % loss of their garden (based on actual fence line not the inaccurate larger boundary shown). The boundary shown on drawings is actually covering large shared public areas that the maintenance is paid for by the housing estate management group. Any application should be based on true and accurate drawings not incorrect information. It should be noted that the application signage displayed on the road has only just arrived to notify residents which does not allow very long for residents to comment.
