I fully support this application (2026/92385). I believe having a clear and properly managed arrangement for the facility is better for the local neighbourhood. The proposed limit of 40 people per session, Traffic Management Plan and traffic marshals on Fridays show that consideration is being given to parking and the impact on surrounding roads. I welcome the effort to keep things organised and minimise disruption to local residents. Any additional guidance and best practice can also be shared by the planning officers and this can also be implemented by the management. On a personal level, having a mosque in Dalton would make a real difference to me, as I currently have to travel more than three miles, whereas I can simply take the bus or car share with at least three other people who live on my street and reach the premises in less than 5 minutes. Being able to attend somewhere more accessible would make life much easier. My grandchildren already attend the education centre and are making great progress. The centre has helped bring people together and created a real sense of community. I would love to see this continue and believe the proposed use would allow the building to keep serving local people for years to come. I therefore ask the Council to look favourably on this application.
