There are too few designated car parking spaces. The surrounding area is already short of available suitable vehicle parking spaces. I do not wish to be forced to hear Friday prayers once a day let alone twice in the day. We seem to have so many taxis parking in the area as it is. Very often these are parked away from the pavement and already cause many problems for the traffic flow. Most days there are hold ups for many vehicle drivers trying to filter into the main Wakefield road and visa versa, trying to get onto a quicker route in the other direction down Longlane. I feel it is necessary to point out that having spoken with many people in Dalton. This application is not a surprise. I hope that the planning permission team listen to the veiws of the local residents and hold with the majority. I have lived in the same house for over thirty five years. I do not believe that this application is in the best interests of the community. I envisage the location would be like a log jam. Emergency vehicles use Broadlane as a rat run to decrease their time of arrival and hopefully have more favourable outcomes.
