As a nearby resident. I have noted a significant increase in passing traffic since the site has opened as a education centre. There is irresponsible and unsafe parking in and around said building. The worst days being thursday evenings and fridays. The centre parking states there is safe parking for around 12 cars. I would estimate currently in and around the area there is in excess of 40-50 cars parked. These obscure pavements, make driving unsafe and block visability at junctions. Should this be permitted this will only worsen as more people will attend. A site with adequate parking should be considered in an area that is not so densely populated. This will have a negative impact on not only the roads and the safety implications for road users and pedestrians,but the quality in accessing local amenities for the broader community. With a potential detriment to those who live in the area.
