This is a brilliant proposal that I support. I'll be car sharing between three of us that live on the same road. Either that or I will take the bus. The volunteers helping at the centre are also brilliant, they are trying so hard to keep order with the parking and things are always improving. I can understand the concerns but things are much better and the only peak time is Friday afternoon which lasts for around 20 minutes. Not really a reason to refuse for an activity taking place weekly for 20 or so minutes! There are actually more cars and people coming and going at the shop across the road. People coming for daily prayers will be much less (probably about 5 or so people) so not really creating more noise than already in the area. Just my opinion. Not everyone will want a mosque and why should they if they are not Muslim. But the Muslims have needed this for so long and it's not a big mosque so we need to be proportionate in the measures we take. Please approve the application.
