I would like to request the planning officers to consider the needs of elderly people, disabled residents and those without access to private transport. For some individuals, travelling several miles to attend religious services can be a significant barrier. Having a suitable place of worship within their own neighbourhood can make an important difference to their independence and participation in community life. Local facilities also reduce reliance on family members or friends for transport. I believe accessibility and inclusion are important considerations when assessing the wider benefits of this proposal. With appropriate arrangements to manage the site's operation, Al-Hira can provide a valuable service without causing unacceptable harm to neighbouring properties. I have been attending some of the courses and one of the motivations for me has been that it gets me out of the house and I get to walk and feel part of the community and I wholeheartedly support this application and hope it gets approval.
