I wish to express my support for Al-Hira Educational Centre's planning application. I recognise that parking is an important consideration, particularly for those living close to the premises. However, parking concerns should be assessed against the actual scale of the proposed activities and the measures being offered to manage them. I have reviewed the Transport Assessment report, attendance restrictions and the use of marshals provides practical ways to minimise disruption. These arrangements can also be monitored and improved where necessary - two way communication can take place with highways experts. I believe it would be disproportionate to refuse a beneficial community facility without properly considering whether these measures can address the concerns raised. I hope the Council will take a balanced approach and approve the application with suitable safeguards.
