I am writing in support of this application. As a resident, who lives just a few doors away, and have been for over 20 years, I believe I am well placed to comment on the potential impact of the proposed use on the surrounding area. Based on my own experience, living just a few doors away, I have not personally encountered any significant issues with traffic congestion, parking or access that would lead me to believe this proposal would have a detrimental impact on the area. In particular, Friday afternoon, when congregational prayers take place, which fall outside of the busiest commenting periods. From my perspective, there is very little reason to expect significant disruption. I understand that there are some objections in respect of parking, congestion and access. However, based on my own experience of living very close to the building, these concerns do not reflect the difficulties experienced. The objections noted do not have real factual substance. A place of worship can make a positive contribution to the local community by providing space for prayer, reflection and community support. The premises, in effect, is a charity. Charities only bring positive things to the area. I therefore ask the council to give consideration to the positive aspects of this proposal, and to the views of nearby residents who support it. I support the application, and believe it should be approved.
