I am writing in support of the proposed mosque at Al-Hira Educational Centre. Residents of Dalton, Moldgreen and neighbouring communities should have reasonable access to places of worship without needing to travel considerable distances. This application has been put in after considering the needs of the community. It's the community that has discussed and brought up this subject with the management and we really believe we can make this work for everyone. I live on top of Hill top Road and genuinely care for my neighbours. I have seen first hand the volunteers direct cars away from Hill Top Road and now everyone has got the message not to park in the area. If any neighbour has any concern this can easily be discussed and solution identified. A local facility provides an opportunity for worshippers to walk, cycle, use public transport or share journeys instead of driving to mosques further away. This is particularly relevant when considering the wider environmental impact of travel across Huddersfield. I appreciate that local traffic arrangements must be managed carefully, but I believe the proposed restrictions and transport measures offer a reasonable approach. I live one minute walk from the venue and this centre would meet a genuine community need, and I hope the Council will approve its proposed use.
