I strongly support the proposed use of Al-Hira Educational Centre as a mosque and community facility. We are constantly encouraged to reduce unnecessary car journeys, walk more and make better use of facilities within our own neighbourhoods. This application provides exactly that opportunity. For residents like myself who live within walking distance of the centre, attending prayers would no longer require a journey to another part of Huddersfield. Although some visitors may still drive, the potential reduction in longer journeys should form part of the overall transport assessment. Rather than looking only at vehicles arriving at the centre, the Council should also consider journeys that a local facility could eliminate elsewhere. Additionally, daily prayers take around 10 mins and Friday prayers at most 30 mins, why anyone thinks this is going to cause chaos around the area is beyond me. Chaos is the traffic between 8.15 and 9am in the morning and also around 5pm, and also the hundreds of cars that park up around Dalton on football match days. I believe this is a positive proposal from both a community and environmental perspective.
