I am writing to support this application. The proposal to split Friday prayers into two separate, smaller sessions of around 40 attendees each is a very practical solution. Instead of one massive influx of visitors all at once, this staggers arrivals and departures over the middle of the day. It spreads out the timing completely, avoiding school drop-offs and rush hours. Furthermore, providing a local facility which most people can walk to will reduce parking stress at other larger mosques across Huddersfield, leading to an overall betterment for the wider town on Fridays. I live 5-10 min walk to the centre and really happy that we can have the chance of having a mosque in my local area. Education centre has not caused any issues for the neighbours in more than 10 years so I'm sure it will remain like this going forward.
