I would like to formally express my support for this planning application in my area. As a resident living just a few houses away from the proposed premises, I feel I am well placed to comment on the potential impact on the immediate neighbourhood. From my own personal experience of living nearby, I have not encountered any significant issues with congestion, parking or access that would cause me concern. In particular, I find it difficult to understand the level of concern being raised about traffic and parking during Friday afternoon prayers. This is generally an off-peak period, and based on my own observations of the surrounding area, there appears to be little reason to expect congestion or access difficulties of the scale being suggested. While I appreciate that others may have different views, I believe objections should be considered in the context of the actual conditions experienced by residents living in the immediate vicinity. I also believe that a mosque would be a valuable addition to the local community, providing a place of worship and a focal point for religious, social and community activities. Places of worship can play an important role in bringing people together, encouraging positive relationships between neighbours and contributing to a more inclusive community. I would encourage the planning authority to give due consideration to the experiences of residents who live close to the proposed premises and who do not share the concerns being raised. It is important that the application is assessed fairly, based on evidence and the practical realities of the location, rather than assumptions about the potential impact. For these reasons, I strongly support the application and hope that permission will be granted, allowing the mosque to serve the local Muslim community while continuing to be a positive and considerate part of the wider neighbourhood.
