| <p>From what I have seen, this property has operated successfully as an education centre for more than 10 years, with visitors attending various classes, courses and community events. During this entire decade, the site caused no issues and received no parking complaints from neighbours. It is highly disappointing that objections are only arising now that the site is being formalised as a mosque application that will still attract a similar number of visitors.</p> <p>Furthermore, the mitigation measures proposed by the applicant - such as staggered sessions (still to be implemented) and active traffic marshals are robust. The council should grant approval, if necessary, through conditions. This would allow the proposed management plan a fair chance to be put into practice and actively monitored, rather than rejecting a vital community facility.</p> |     |
