This route will be a valuable addition to the area, it will encourage people to enjoy nature and the outdoors, it will also help to reduce cycle traffic and pedestrians on the surrounding roads, promoting a safer environment, however, to link this route to the existing Greenway in Meltham, there needs to also be permission for horses because they are allowed on the Meltham part of the greenway, but it's would be extremely beneficial from a safety aspect to allow horses on there, thus, reducing the need for people to ride horses along the surrounding roads. By allowing horses on there you would be opening up valuable space where we can ride safely off the road, thus reducing the strain on emergency services where there are many incidents with horses on the road, this would be such an incredible addition to our local area, but it needs to be accessible to ALL vulnerable road users, as all quiet lanes/greenways etc usually are.
