## Design & Access Statement

Date 13<sup>th</sup> September 2026  
Client: Redacted  
Site Ref: 52, Paris, Scholes, Holmfirth  
Post code HD9 1SY

### Brief description:

52, Paris has 14 front elevation windows, which are currently aluminium and double glazed circa 1980, installed prior to the building becoming listed.

The homeowner, Redacted would like to replace these windows with traditional timber windows, double glazed.

The replacement timber windows will be painted and introduce a horizontal glazing bar to the same detail as installed in the adjoining neighbouring property at 54, Paris; (homeowner Redacted), this horizontal bar applies to the ground floor and 1<sup>st</sup> floor windows only.

The existing internal timber linings shall be cut back to allow for the deeper timber frame which will locate at same external position as existing.

The neighbouring house, number 54, applied for listed building consent which was granted for similar windows which we manufactured and installed to the specification granted.

These windows shall be in keeping with what is there next door.

The new windows are to be handmade and constructed from traditional painted timber profiles.
