

Appendix A – Climate Change Statement

Climate Change Statement for Planning Applications

Part 1: Applicant details

Name of applicant/agent	Steve Bacon Agent DB Architects
Site Address	68 Wood Lane, Newsome Huddersfield HD4 6PT
Description of Development	Dormer extensions

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
The dormers will be constructed in matching materials and very well insulated and will include perimeter insulation
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
All materials of construction will be sourced locally and the building works carried out by local craftsmen. Carbon footprint minimised by using timber construction for dormers and roof structure and partitions throughout.
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)
The dormers will be of timber construction and clad in composite boarding
Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the

Building Regulations ? (See section 5)
The dormers are regular rectangular shape partly set into the roof slope and the roof structure will be upgraded with new insulation
Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)
The property is not in a flood zone
Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)
Water stress is not affected by the extension
Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)
N/A
Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)
N/A.
