1.0 Introduction

- 1.1 Paragon Highways have been appointed to prepare this Technical Note for a new access arrangement associated with a proposed residential dwelling to the north of the dwelling known as Windyridge served off Cold Hill Lane.
- 1.2 The proposals comprise a direct access driveway served off Cold Hill Lane to allow access to the proposed dwelling, formed in part of the garden area of the existing dwelling known as Windyridge.
- 1.3 This Technical Note provides information on the proposed access arrangements. The site location in relation to the local highway network can be found in Figure 1.

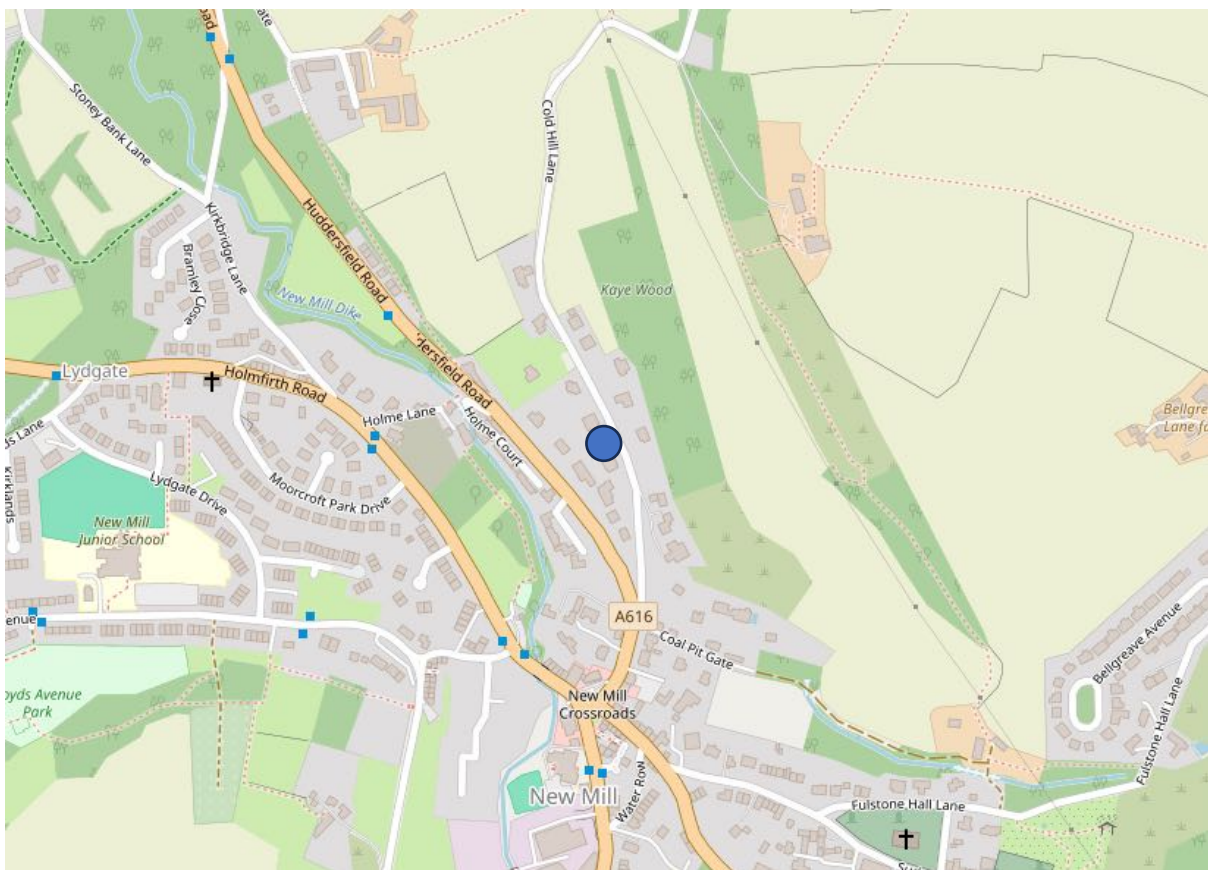

Figure 1 Site location

2.0 Existing Situation

Site Description

- 2.1 The application site is located within New Mill, a village in the civil Parish of Holme Valley, and within the metropolitan borough of Kirklees. The site lies approximately 3.65 km to the south east of the centre of the village of Honley, and around 2.1 km to the north east of the town centre of Holmfirth.
- 2.2 The proposed development site is bound by a neighbouring residential dwelling to the north, Cold Hill Lane to the east, the host property Windyridge to the south, and further residential dwellings to the west.
- 2.3 Cold Hill Lane is subject to low traffic volumes and low speeds due to its location and arrangement. Following a 7-day speed survey undertaken in October 2025, a total of 1,511 vehicles were recorded, averaging around 216 per day, or 9 per hour. This traffic is likely primarily generated by the local residential properties served along Cold Hill Lane.
- 2.4 The full results of the speed survey can be found at Appendix A.

Road Traffic Accidents

- 2.5 Road traffic accident data has been collected from the CrashMap website, which confirms there have been zero recorded injury accidents within the vicinity of the site along Cold Hill Lane, including its junction with Huddersfield Road. When combined with the low recorded speeds and the rural residential character of the lane, this record supports the view that Cold Hill Lane operates safely. An extract from the CrashMap search can be found at Figure 2.

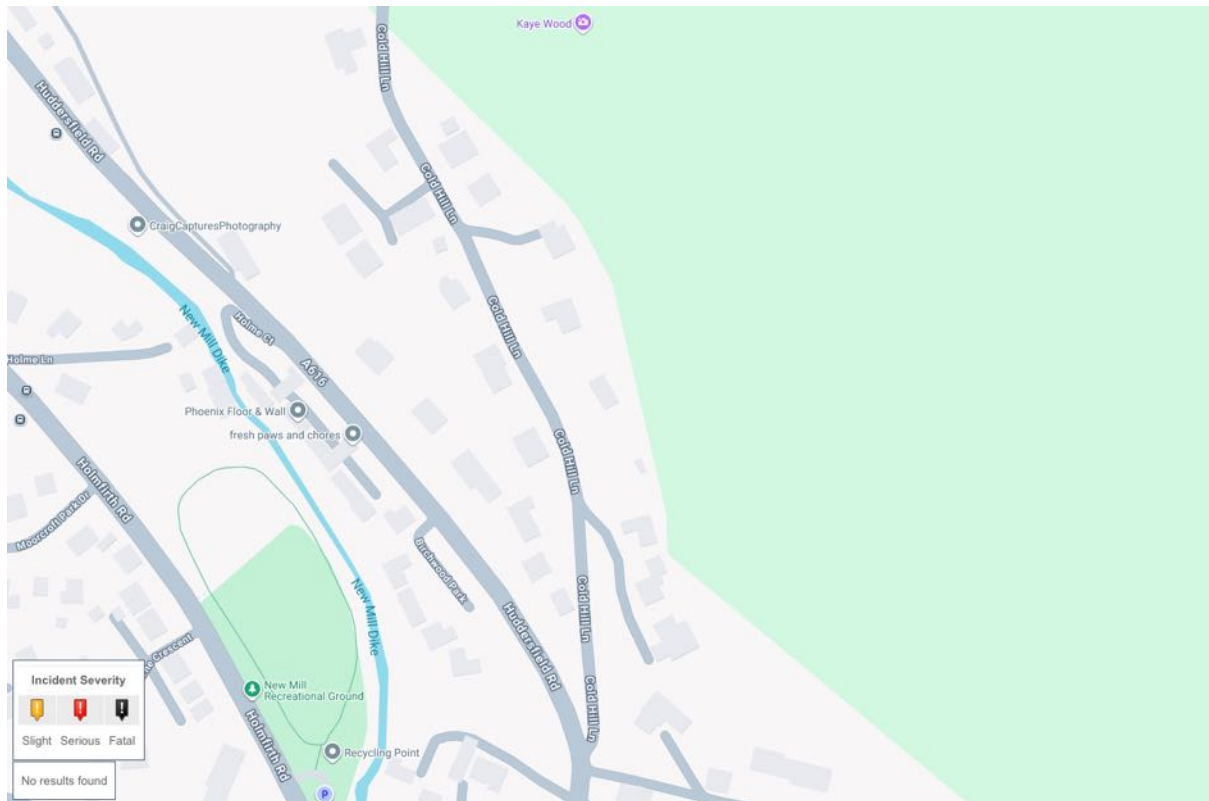

Figure 2 CrashMap search area

3.0 Access Proposals

- 3.1 The proposed access will be formed directly from Cold Hill Lane, as shown in the plan at Appendix B. The access will be 4.2 metres wide, opening out into a large parking courtyard area, allowing vehicles to enter and exit the site in a forward gear.
- 3.2 Cold Hill Lane is subject to the national speed limit; however, due to the alignment and nature of the road, speeds were predicted to be much lower. To ascertain actual traffic speeds, an independent 7-day ATC speed survey was undertaken on Cold Hill Lane. The speed survey results can be found at Appendix A and demonstrate 85th percentile wet weather speeds of 22.5 mph for vehicles travelling from the north, and 24.4 mph for vehicles travelling from the south.
- 3.3 Given the recorded traffic speeds, the stopping sight distance (SSD) requirements within Manual for Streets (MfS) are considered appropriate. Using SSD values from MfS, the 85th percentile speeds would require an X-distance of 2 metres and a Y-distance of 32 metres to the north and 33.5 metres to the south.
- 3.4 A visibility splay of 2 m x 33.5 m is achievable to the south, whilst a splay of 2 m x 18 m is achievable to the north. Both splays are measured to wheel track (500 mm into the carriageway). The visibility splay to the north is substandard by 14 metres.
- 3.5 However, Manual for Streets 2 (MfS 2) states that:
- It has often been assumed that a failure to provide visibility at priority junctions in accordance with the values recommended in MfS 1 or DMRB (as appropriate) will result in an increased risk of injury collisions. Research carried out by TMS Consultancy for MfS 2 has found no evidence of this.*
- 3.6 MfS 2 also emphasises the necessity of context-sensitive solutions, specifically stating that "the absence of wide visibility splays at private driveways will encourage drivers to emerge more cautiously."
- 3.7 Taking these factors together; the low traffic volumes (averaging just 9 vehicles per hour), low recorded speeds (85th percentile below 25 mph), the

clean accident record along Cold Hill Lane, and the recognised principle that reduced visibility encourages more cautious driver behaviour, there is no evidence that the proposed access would give rise to a road safety concern.

4.0 Conclusion

- 4.1 This Technical Note has considered the proposals for a new access arrangement associated with a proposed residential dwelling to the north of the dwelling known as Windyridge served off Cold Hill Lane.
- 4.2 The proposed access arrangement offers full visibility compliance to the south and a shortfall of 14 metres to the north. MfS 2 guidance confirms that research has found no evidence linking substandard visibility splays with increased collision risk, and notes that reduced visibility at private driveways encourages more cautious emergence. When considered alongside the specific characteristics of Cold Hill Lane; namely its very low traffic volumes, low actual speeds, and absence of recorded injury accidents, the substandard visibility to the north is not considered to present an unacceptable safety risk.
- 4.3 It is therefore concluded that the development should be considered acceptable and there are no highway safety reasons why planning consent for the proposed access should not be granted.
