

Appendix A – Climate Change Statement

Climate Change Statement for Planning Applications

Part 1: Applicant details

Name of applicant/agent	Mr. R. Outram
Site Address	36 Wessenden Head Road, Meltham, West Yorkshire, HD9 4EU
Description of Development	Proposed solar panels to existing front/rear roofs

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
The proposed solar panels are to directly reduce electric demand from the 'Grid'
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
The solar panel company is a local one, using local people on site
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

The solar panels reduce the use of carbon based energy sources completely.

Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)

The solar panels are placed and are the latest - to be efficient for the household.

Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)

—

Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)

—

Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)

— The solar panel company, will only use one vehicle - to be an electric one, and people will be local to minimise additional travel.

Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)

The use, only, of electric power tools to be used, and if necessary to be equipped with an air bag - so keeping air quality good, and sound down.
