**Appendix A – Climate Change Statement**

**Climate Change Statement for Planning Applications**

**Part 1: Applicant details**

| | |
|---|---|
| Name of applicant/agent | Alex Dailly |
| Site Address | 54 Brook Lane, Golcar |
| Description of Development | Internal alterations to a Listed Dwelling |

**Part 2: Climate Change Mitigation measures**

| |
|---|
| Please respond to the following questions considering the measures set out in the Climate Change Guidance note: |
| |
| Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2) |
| There will be no change to energy demand in relation to the internal changes |
| Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3) |
| Materials supplied will be sourced as local as possible |
| Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4) |

| |
|---|
| Materials will be recycled where possible. |
| Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5) |
| There will be minimal changes to the energy efficiency |
| Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6) |
| There will be no changes to external envelope so flooding is not a material consideration |
| Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8) |
| The proposed development does not change any water related requirements |
| Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8) |
| There will be no changes to biodiversity from the proposed works |
| Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9) |
| The development will have no impact on air quality. There will be no increased pollution risk. |
