It is with much regret that another e-mail has to be sent regarding the demolition of this historic building. The shears is not only of historic value to past history, it is also a foundation for the local community. My property is opposite and I have lived here for 54 years. Not only would the demolition of this building be an absolute disgrace, it would also ruin the views of the beautiful landscape that surrounds it. I personally and like so many others hope that planning is not granted . Thanks
